MANAGEMENT DISCUSSION AND ANALYSIS REPORT

GLOBAL ECONOMIC OUTLOOK

In 2015, global economic activity remained subdued. Oil prices have declined markedly since September 2015, reflecting expectations of sustained increases in production by Organization of the Petroleum Exporting Countries (OPEC) members amid continued global oil production in excess of oil consumption. Future markets are currently suggesting only modest increases in prices in 2016 and 2017. Prices of other commodities, especially metals, have fallen as well.

Fluctuations in overall economic activity are the indicators of movements in industrial packaging demand. The industrial packaging sector is also dependent upon the fortunes of the key user industries, notably chemicals, lubricants, bulk food and beverages, building and construction. Asia accounts for the largest share of the industrial packaging market at 31% in 2013 and will continue to see the highest growth. The region will increase its share of total demand to 34% by 2020.

Rigid industrial packaging accounts for the majority of industrial packaging, although sacks represent the largest single sector under review. In terms of end use markets for industrial packaging, the chemicals and pharmaceuticals sector is the most significant, accounting for more than 30% of total sales.

INDIAN ECONOMIC CONDITIONS AND FIBC MARKET

India's economy has witnessed a significant economic growth in the recent past, growing by 7.3% in FY 2015 as against 6.9% in FY 2014. The economic activities which witnessed significant growth were 'financing, insurance, real estate and business services' at 11.5% and 'trade, hotels, transport, communication services' at 10.7%.

While public investment and urban consumption were the major drivers of growth in FY 2015, a revival of private investment and rural consumption is critical if growth is to remain strong in FY 2016 and FY 2017, given the likely sluggish recovery in the advanced economies and the anemic outlook for global trade.

The Indian packaging industry, growing at an annual rate of more than 15%, is valued at \$ 15.6 billion. More than 80% of the total packaging in India constitutes rigid packaging. The remaining 20% comprises flexible packaging. Indian packaging machinery exports are rapidly growing.

The flexible bulk packaging industry that includes woven sacks, leno bags, wrapping fabric, and flexible intermediate bulk container (FIBC) is growing at over 20% with FIBC containers expected to grow threefold in the next 5 years riding an increased industrial production and a shift toward higher-value containers offering enhanced performance and supply chain efficiency.

Your Company intends to increase market share to enhance shareholders' value and has emerged as the leading supplier of woven bags to various customers in eastern India.

Weaknesses and Threats

Volatility in prices of raw materials: The main raw material used in the manufacture of FIBC is polypropylene, which is a crude derivative and subject to price fluctuations. Raw materials account for 60-70% of costs in FIBC and shortage of raw materials leads to stiff competition for the same.

Competition threat: Your Company has always been exposed to competition threats from various large and small organizations. The rise in competition can create pressure on market share and erode margins.

Labour problems: As the polymer based industry is labour oriented, your Company faces occasional labour problems and also availability of good quality labour.

Risks and Concerns

Risk is an inherent aspect of every business. Risk Management has become very important part of business in today's economic environment. The risk management system of your company identifies, monitors and takes precautionary measures in respect of the events that may pose risks for the business. The Risk Management Approach ensures that risks are kept well under controllable levels.

Key Risk	Impact upon the Company	Risk Mitigation
Raw Material	The basic raw material used in manufacturing process is polypropylene, which is crude derivative and is subject to volatility in price and availability that leads to stoppage in production and increase in manufacturing costs.	The Company procures polypropylene primarily from Haldia Petrochemicals Ltd. To ensure continuous availability it has also tied with other suppliers like Reliance Industries Ltd, Indian Oil Corporation etc. It also imports in times of non-availability to fulfill its requirement. However the company has no control over pricing mechanism of crude derivatives which depend on international prices.
Product Quality	The Company is sometimes unable to manufacture good quality jumbo bags to cater to the needs of end users.	Your Company is always in the process to improve the quality of jumbo bags which may help end user. The quality control team continuously works towards quality improvement.
Human Resources	The industry being labour-intensive, labour unrest is a common phenomenon.	Your Company takes various measures to ensure that employee grievances are addressed quickly and mitigated satisfactorily.
Competition Risk	The Indian packaging market is highly competitive with various large and small companies. The increase in competition can create pressure on market share and erode margins. As on 31st March, 2016, there were 125 permanent employees on the pay rolls of the company.

OUTLOOK

The FIBC market is characterized by innovative offerings and customizations. With increase in the cost of raw materials, FIBC vendors have to increase the prices of their end products or reduce their profit margins, which will have an adverse effect on FIBC market growth. However as the polymer based industry is labour oriented and due to low labour cost, the foreign users find competitive to source their supply from developing countries. The Indian polymer based industry has lucrative growth potential as the country focuses on enhancing product quality and cost reduction.

Annexure A - Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

TO THE MEMBERS OF RDB RASAYANS LIMITED

We have audited the internal financial controls over financial reporting of RDB RASAYANS LIMITED as of 31 March 2016 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that -

- i) Pertains to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company.
- ii) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company.
- iii) Provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
